December 4, 2023

Dove Street, Osceola Circle, Oriole Circle and Robin Lane Residents,

Smoke testing of the gravity sewer line in this area is scheduled for 12/11/23 around noon. Smoke testing is used to detect leaks in the gravity lines as the smoke escapes from cracks in the pipes. The smoke will exit the sewer vents on the roofs of the homes. If smoke is noticed in the home that could indicate an issue with the connected plumbing. The smoke is harmless and non-damaging to home interiors.

Home attendance during smoke testing is not required, but if there is any suspicion of sewer gas leaking in your home, attendance during smoke testing could help confirm the status of the plumbing.

Please call me @ 218-820-8809 with any further questions.

Thank you,

Joe Zierden  
Public Works Supervisor
